

US HEREDITARY ANGIOEDEMA ASSOCIATION

MEMBERS IN HAEA

6,156 patients

953 youngsters age 12-26 patients/caregivers

INFORMATION ABOUT THE MEMBER ORGANISATION

1 major achievement of member organization for patient community

The US has successfully supported researchers in clinical trials for modern HAE therapies resulting in 7 FDA approved medications that are now available to patients

Current available treatment options

Berinert
Cinryze
Firazyr
Kalbator
Ruconest
Takhzyro
Haegarda
Androgens
Fresh frozen plasma

Barriers to accessing treatment

The treatment is very expensive in the US, and patients often need to fight insurance companies to get access to the treatment

YOUNGSTER'S EXPERIENCE

Common challenges that young patients experience

The United States is so big geographically, that Youngsters can go without knowing anyone else with HAE (outside their immediate family) until they attend a conference or meetup.

What does "Creating a path to better health" mean to you?

"Acknowledging the work of generations of HAE advocates and using their efforts as inspiration to continue advocating for a better future."
